STARING AT PEOPLE

There is a big difference in the way we make others feel if we stare at them versus making eye contact. Looking at people for too long is usually upsetting.

Read and answer each question below:

What's the difference between eye contact and staring?

How does it make others feel when they're stared at?

What could happen if you stare at someone else for a long time?

How can you show someone you're interested without staring?

When is a time people might stare at others?
